Welcome

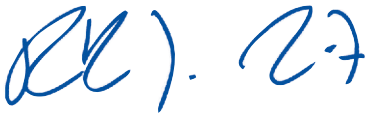

I warmly welcome you to the 2017 Horasis China Meeting. My thanks go to the Sheffield City Region and the China Federation of Industrial Economics, as well as to all our partners and supporters.

At this 13th Horasis meeting on China, senior executives from around the world will discuss Chinese firms' growing impact on global business. Participants will also examine the state of the global economy and China's role in shaping the new economic world.

With the Horasis China Meeting, Horasis has created a strong partnership with China. Introduced in 2005, the meeting has become one of the foremost global business gatherings on China.

It is my sincere hope that the 2017 Horasis China Meeting will further promote win-win economic relations, stimulate innovation and provide business opportunities for corporations from China and the world.

I wish you a thought-provoking and exceptional meeting.

Dr. Frank-Jürgen Richter
Chairman
Horasis: The Global Visions Community

Welcome

I am delighted to welcome you to the Sheffield City Region. A region with a distinctive history and a startlingly bright future. I know you will be overwhelmed by the warmth of our welcome and I hope that over the coming days as we debate globally significant issues you will get a sense of what this great city region has to offer.

We're a proud place but also one that prefers to be modest about our glorious history of innovation, of 'making' and the pursuit of excellence. It was in this city region that stainless steel, that most ubiquitous of materials, was invented. It was here that the world's fastest steam locomotive was built. And now it is here where we are pioneering research and industrial collaboration in materials, metals and production that are attracting global manufacturers such as McLaren Automotive, Boeing and Rolls Royce.

As we enter the world's fourth Industrial Revolution I have no doubt that our greatest achievements are still in front of us.

Our own local themes for this Horasis China Meeting are simple; Heritage, Resilience, Learning. We are proud of our heritage as a place at the heart of the Industrial Revolution. Our resilience has enabled us to emerge from the decline of large scale industrial production with industrial led research and collaboration through learning – both now at the heart of our economic future.

This interface between heritage, resilience and learning is why I am so delighted that both of the city regions great universities are our partners in Horasis China Meeting. the University of Sheffield and Sheffield Hallam University both have deeply rooted relationships with China as well as fantastically strong regional footprints.

China's place in the world economy; it's an incredibly pertinent theme for this Horasis Meeting to explore. I look forward to being part of the discussion with each and everyone one of you.
