# Welcome

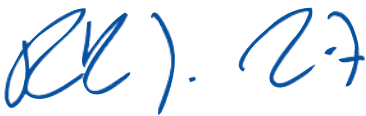

I warmly welcome you to the 2017 Horasis India Meeting and sincerely hope that you will enjoy the discussions.

The Horasis India Meeting is the foremost annual gathering of Indian business leaders and their global counterparts. This select group of global leaders will gather to create a powerful platform for cooperation between India and the rest of the world.

The meeting will engage participants to provide a holistic and timely perspective on the future direction for India. Also, participants will discuss Indian firms' growing impact on global business.

It is my sincere hope that the Horasis India Meeting will further promote win-win economic relations, stimulate innovation and provide business opportunities for corporations from India and the world.

I wish you a thought-provoking and exceptional meeting.

Dr. Frank-Jürgen Richter  
Chairman  
Horasis: The Global Visions Community  
Switzerland

# Welcome

Ladies and Gentlemen,

Welcome to the Canton of Bern! It is a great honor for me to be able to welcome you to the Horasis India Meeting in Interlaken. We are delighted to be hosting a networking event between partners from India and the Canton of Bern for the second time after 2015.

For you as entrepreneurs, business leaders and high-level representatives of public authorities, the Horasis India Meeting is an opportunity to meet new partners, explore new visions and discover new business ideas. I am very much looking forward to sharing thoughts and ideas with you in person.

I am convinced that we will all find the experience extremely enriching. After all, India is Switzerland's third largest Asian trading partner and our most important trading partner in southern Asia. The Indian market has great potential for Swiss businesses. What is more, Switzerland is one of the ten largest investors in India. Around 250 Swiss companies have a presence in your country, either through joint ventures or with their own branch offices.

Enjoy your two days here as our guests. We hope you will make the most of the opportunity to discover the spectacular mountain scenery of the Jungfrau region. This backdrop has already inspired many Bollywood film teams from India, and we hope that you too will draw inspiration from the unique beauty of our natural environment.

# Welcome

A warm welcome to Bern

The Canton of Bern boasts an excellent infrastructure, moderate corporate taxation and a highly qualified, multilingual workforce – all set in a breathtaking natural landscape.

Besides an outstanding vocational education system, our location is home to two excellent universities and a closely-knit network of companies undertaking cutting-edge research. The federal capital, Bern, is the political center of Switzerland and as such guarantees easy access to politicians and public authorities as well as short decision-making paths. The high quality of living and security here in the Canton of Bern and our wide range of leisure and cultural activities are second to none.

Two current focal points of activity in the Canton of Bern are particularly close to my heart. Firstly, Biel / Bienne, which is probably the most important watchmaking and high-tech hub in Switzerland, is home to the brand new Switzerland Innovation Park. The subject of Digital Industry – connecting industrial manufacturing with the latest information and communication technology – can be experienced live at this ever expanding business park, the facilities of which are available for your company to make use of.

The second focal point lies in a highly specialized field of medicine and medical technology. We have the ambitious aim of becoming the leading medical hub in Switzerland, with the recently opened Swiss Institute for Translational and Entrepreneurial Medicine, where research, development and clinical application are brought together and where the next generation of medical practitioners are being taught to think like entrepreneurs in a hands-on way.

I hope that over the next two days you will get the opportunity to experience the diversity of our region and our strength as a business and industrial center for yourselves and that your time here will bring you many exciting encounters, fruitful discussions and valuable contacts.

Dr Sebastian Friess  
President  
Bern Economic Development Agency  
Switzerland

# Welcome

It is a great honor for us to be able to host the Horasis India Meeting in Interlaken for the second time. On behalf of the authorities and the people of Interlaken, I would like to extend a warm welcome to all participants.

Tourists have been coming to Interlaken for more than 200 years. Invariably they are fascinated by the stupendous natural setting with the world-famous icy icons Eiger, Mönch and Jungfrau and the two lakes. The renowned, late lamented Bollywood director Yash Chopra, Interlaken's honorary ambassador, produced a number of well-known films in our region. To this day, the landscapes in these films prompt many Indians to visit our region.

I hope you will have a successful conference in an inspiring setting!

# Welcome

India is the fastest growing economy with an average pace of growth of over 7% for the past decade. This is only the beginning. India can build up to a 10 per cent GDP growth rate over the next three years. For the current year, CII analysis shows that the GDP growth rate can touch 8%.

The analysis reveals that there is significant scope for increasing the GDP growth rate by an additional 1% each year. This extra growth can come from different sources, such as construction under the infrastructure building programs, low-cost housing initiative of the Government for building 20 million new houses, increasing participation of women, and so on. Sectors such as healthcare, content creation for real and virtual platforms, and e-commerce are seeing huge surge, leading to more employment opportunities and creating a virtuous cycle of demand and investment.

Further, over the last three years, the reform agenda has picked up and substantive policies have been announced. These include the Goods and Services Tax (GST), which is expected to be rolled out as expected in July and will be a game-changing reform. Also, the action has now moved to the state governments. State governments are coming out with new investment incentives and specific projects and are also undertaking investment promotion summits and roadshows, including overseas.

Many new programs of significant impact have been rolled out by the government – Make in India, Smart Cities, Digital India, Skill India, Clean Energy, Startup India, etc – which lay the foundation for strong growth.

With this wide range of investment opportunities in India and the dedicated efforts of the Government of India, the scenario in the country has completely transformed. This is visible in the rising FDI levels as well as growing domestic demand. Today, as we present our perspectives on investment environment in India, we can be certain that the 1% extra GDP growth will be a key attraction for overseas investors.

With this background, CII is partnering again with Horasis to organize the Horasis India Meeting on 25-26 June at Interlaken, Switzerland. We welcome all the participants and hope that the discussions leave the participants with a better understanding of the rapid changes occurring in India.

Chandrajit Banerjee
